EDUCATION

Georgia Institute of Technology

Bachelor of Science in Computer Science | GPA: 3.88

Atlanta, GA

Expected December 2024

Threads: Artificial Intelligence, Systems and Architectures

Honors: Dean's List, Faculty Honors

EXPERIENCE

Software Engineer Intern

MarketAxess

Jun 2023 – Present

New York City, NY

- Build a trade ticket suitable for all in scope products to enable post trade actions such as cancelling and amending trades and to allow clients to analyze trade details
- Learn about the MarketAxess Automation team and participate in sprint ceremonies to understand how to contribute to developing the trading automation suite, such as Auto-X
- Analyze the feasibility of incorporating a new product into the global rates trading ecosystem from a technological and business perspective for product sponsors

Software Engineer

Georgia Tech Student Government Association IT Board

Mar 2023 – Present

Atlanta, GA

- Develop applications used to automate and support internal SGA processes and student funding requests
- Learn about SGA functions and how to make meaningful contributions that benefit the Georgia Tech community

Software Engineer Intern

Unfound

Jan 2023 – Jun 2023

Remote

- Collaborated with interns to implement new and improve upon existing features for a mobile application that allows users to share and discover unique places
- Added proper post reporting and user blocking feedback to comply with Google Developer Policies
- Debugged various performance issues during the rendering of components to ensure a smooth app experience

Technology Development Program Intern

Optum

Jun 2022 – Aug 2022

Minneapolis, MN

- Created a proof of concept web application in a 4-person team for matching acquired entity capabilities to road maps for integration into the United Healthcare ecosystem
- Analyzed sample acquisitions and road maps to formulate a matching algorithm to be used saving 100s of hours of meetings between architects and integration team members

PROJECTS

Museview | SvelteKit, HTML, CSS, MongoDB

Jun 2023 – Present

- Learn how to build a full stack application with Svelte and Sveltekit by creating a Letterboxd-inspired music reviewing site

Health Informations on FHIR | React, HTML, CSS, PostgreSQL

Aug 2022 – Present

- Engineer a web application converting user input into Fast Health Interoperability Resources structured documents, resulting in more efficient patient data turnaround rates between clinics
- Organize meetings and assign tasks using scrum methodologies as a part of a Georgia Tech's selective Vertically Integrated Projects program to ensure deliverables are met

SKILLS

Languages: Java, Javascript, Python

Frameworks: React, Node.js, Express, Svelte

Developer Tools: Git, Jira, VS Code, IntelliJ

Concepts: Object Oriented Programming, Data Structures and Algorithms, Scrum Development Process
